Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

Claims 2 and 6 are objected to because of the following informalities: The examiner believes “clapping” may mean “clamping”. Clarification is requested. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Menard (U.S. Pat. No. 6,416,187). Menard teaches a process of assembling an optical engine comprising mounting one optical engine 24 on a carrier 12, providing position adjusting device 40, 16 outside the casing to connect to the carrier, adjusting the position of the optical engine in situ via the positioning device (col. 5, lines 5-17), fixing the carrier via an adhesive (col 5, lines 19-20), and removing the position adjusting device.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kitabayashi (U.S. Pat. No. 6,857,745). Kitabayashi teaches a process of assembling an optical engine comprising mounting one optical engine on a carrier, providing position adjusting device outside the casing to connect to the carrier, adjusting the position of the optical engine in situ via the positioning device fixing the carrier via a UV adhesive (col 12, lines 5-7), and removing the position adjusting device. The applicant is directed to review figures 4-5 and 15 for example.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Menard (U.S. Pat. No. 6,416,187) in view of Morii (U.S. Pat. No. 6,693,751). Menard teaches the salient features of the claimed invention except for using a UV cured adhesive. Morii teaches in col. 2, lines 37-39 that it was known to use a UV cured adhesive. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Morii for the purpose of controlling the exact cure time. The applicant should note that it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
